## Description

The Hyundai DHY35KSEm is a single phase diesel generator with a maximum output of 33kW/45kVA. Designed for domestic or professional use, the DHY35KSEm is powered by a 35hp 1500rpm diesel engine and is equipped an AVR alternator to produce clean energy. This means that any sensitive electronic equipment, such as televisions, PCs and laptops, can safely be powered by the DHY35KSEm. The DHY35KSEm can be started manually by using the key, or connected to an ATS (Automatic Transfer Switch) system. An ATS system will automatically detect a loss of power from the mains, turn your DHY35KSEm on automatically, and then turn it off again when power returns from the mains. The DHY35KSEm benefits from being an economical diesel generator, capable of running on red diesel which is significantly cheaper than road diesel and is safer to store than petrol. Housed within a sound proof canopy that undergoes an anti-corrosion painting process called electrophoretic painting. This process ensures all areas of the canopy have an evenly applied thickness of paint, ensuring maximum corrosion protection. Fitted with an MRS 10 control panel interface as standard, its user friendly interface gives fingertip control over several operating parameters as well as providing information statistics relating to engine, output and generator running parameters. Running at 1500rpm, the engine is stressed less than in 3000rpm generators and this helps extend the lifespan of the machine if properly serviced.

## Features

- 1500rpm for longevity and low maintenance
- AVR for clean electrical output
- Silenced, weather-proof canopy

## Specification

Field	Detail
Model Code	DHY35KSEm
Engine Brand	Hyundai
KVA (Stand By)	45
Max Watts	33kW
RPM	1500
Phase	Single phase
Fuel	Diesel
Weight (Kgs)	1045

**Carriage Free UK mainland.**
